

To get a better sense of your strengths and interests, and for you to become a little more familiar with GlobalGiving's work, we have a small programming assignment for you. Although coding projects can often expand to fill whatever time is available, the intent is for this to take between 4 to 8 hours. Please timebox yourself and stop if you reach 8 hours.

### Task

Using the GlobalGiving API, develop a webpage that displays at least 50 projects in any manner that lets a user view, browse, or in some way filter the list.

### Requirements

- Should show a minimum of 50 projects
- Can show them in any format you'd like ([list](#), [grid](#), [map](#), etc.)
- Should work on the latest version of Chrome on a desktop computer with high-speed internet
- May be in any programming language or mix of languages.
- You may download and load a cached copy of the API results to allow for static site generation. You may query the API live, too.
- There are many valid ways to be successful at this.

### Deliverables

- Please provide a link to a GitHub repo with your solution, email a zip file, or a link to a website showing your submission.
- Please provide a written overview of your solution, including any instructions that we need to run it. Can be an email, Google Doc, README file in GitHub, etc. Since you are limiting yourself to 4-8 hours, feel free to denote what would be included in the "next version" if you had more time.

### Helpful Links

- <https://www.globalgiving.org/api/> - The API is free to sign up for and you should have access to all of the API calls + documentation that you need immediately.
- CSS: <https://www.globalgiving.org/v2/css/minimal.css> - This is not an assessment of your UX or UI design skills. To that end, you can reuse our CSS stylesheet if helpful (but not required).
- Styleguide: <https://www.globalgiving.org/styleguide/> - If reusing our CSS, the styleguide should be helpful.

### Copyright

- Our Content: You have permission to reuse any images, CSS, or code hosted on GlobalGiving.org for this submission, but you do not have to do so.
- Your Content: You retain all rights to your work. We will only use your submission as a part of the interview process and will not reuse, copy, remix, distribute, or otherwise use your solution outside of the interview process.
